

Water Development Projects

Water Fund balance:
\$3,600

Funds needed:

Deep water well - Kampala village - \$8,800

Fish pond income generation project - Approx \$10,000

Emmanuel Clinic

Building Funds donated to date: 35,372.12

Funds needed:

Completion of second ward (clinic is 90% complete): \$2000

Solar power for lab and second ward: \$5,000

Clinic furniture, desks, filing cabinets, shelves, chairs, dressers: \$1000

Medication and Lab monthly supplies. Clinic staffing: doctor, 2 nurses, clinical officer and lab tech: \$2,700 per month

Prayerfully consider a monthly donation of \$10 - \$25 or more to support clinic staff!

**Thank you!
Donors, Volunteers,
Churches, Organizations,
Foundations**

Solar Water Project Blessed with Success!

The 40 to 80 families, most of whom are women widowed and children orphaned, refugees of the LRA War living on the Family Empowerment Uganda- Cnaan Farm (FEM) and surrounding villagers who come to be seen at Emmanuel Clinic are drinking from a new solar-powered water well that was completed in December 2011. The \$27,000 project was supported by funding from the Atkinson Foundation, the National Ground Water Research and Education Foundation, and Hope 2 One Life's own fundraising through World Water Day events and private donations. There are also about 6,500 residents within and surrounding the adjoining small villages of Rakayata, Katamara and Kampala village who have access to the FEM wells due to the reliable supply of clean water. These villages encompass people generally living within a 45 to 90 minute walk (approx. 10

km) of the FEM. The new water system can deliver about 13,000 liters of clean water each day entirely with solar power. This well featured the installation of both a direct solar-powered submersible pump and a hand pump on the same well head. The hand pump serves as a backup in case of mechanical failure and also serves the local villagers and nursery school. Hope 2 One Life added a "tap stand" with two valved taps for filling water containers, fed by a sub-surface pipe connection to the elevated tank.

The water from this new system is now supplying running water to the Emmanuel clinic (dedicated in January 2012), as well as the community kitchen, latrine toilets, show-gardens, large garden and orchards through drip irrigation, housing and more!

Tom

Osborne, PH, hydrologist

The success and blessings of this project are best testified

to by the smiling faces of the FEM residents (photo above) drawing water from the new water system.

Emmanuel Clinic Dedicated!

A small army of worker bees descended on the Family Empowerment Uganda - Cnaan Farm in Uganda in January 2012 with the goal of installing solar power to their newly built medical clinic, teaching village healthcare worker, treating patients in the new clinic and supplying running water to the clinic, latrines and bathhouses, via the newly constructed solar deep water well. Nadine assembled a team of 4 people for the solar and water project and 4 people for the medical work. None of us on the solar power team had been to Africa so we were in for quite a shock with some of the obstacles we encountered while trying to

complete the task. Nadine had warned us that if plan A, B and C don't work we may need a plan D (or Z!) and we were soon to find out what she was talking about. Our solar team included Ty Hefner an engineer and project manager, Stu Stevens a plumber/jack of all trades, Kam Christenson an electrician and myself, Sam Ausen, a welder and flight RN. Luckily the solar panels had been shipped over to Africa ahead of our trip as purchasing supplies locally proved to be very challenging. Ty designed a steel frame to secure the solar panels to the roof of the clinic and it was off to the local village to buy supplies and get to work. The solar project took about a week to complete with all wiring and plumbing included and it was very gratifying to have lights, outlets and a warm shower at the end of it all. The village workers that helped were very hard workers who seemed to pick up on stuff very fast. The biggest thing we all learned from this project is that the villagers were very

appreciative of our efforts and they made us feel welcome, useful and loved. I was very honored to be part of this team. The 4 ladies on the Medical team: Brenda Gilmore, FNP, Jessica Gilmore, RN, Melissa Christianson, EMT, and Nadine Hart, PA-C were awesome to see in action and now I know why the villagers were so anxious to learn from them. We taught village healthcare workers, held a village teaching and "jubilee", painted and moved into the clinic, dedicated Emmanuel clinic followed by a village clinic. We thank God and the donors and supporters who made this clinic dream possible!

Sam Ausen, RN

Our Mission: To provide hope, clean water, healthcare and educational resources for impoverished people.

Hope 2 One Life is empowering widows, orphans and families in Uganda with the goal toward community restoration from war and poverty, self independence and sustainability, while valuing each life with dignity and all persons as children of God.

"I was thirsty and you gave me something to drink" Matthew 25:35

Uganda Mission Team continues on to Orphanages & Hospital

The team visited Kitgum: KIOCC, Tender Trust orphanages and NUCBACD (a deaf and blind school) where we give quarterly medical support for the past 5 years. We hired a nurse for NUCBACD. We treated infants and children at KIOCC. Ready Relief box of medicines and supplies were donated via Heart to Heart International (Emmanuel Clinic, Nurse Suzan and village workers also received Ready Relief medications and supplies). Baby Robinson and other kids were held and played with. Gardens, seeds, drip irrigation kits and clothes donated. Following we travelled to Kalongo to Dr. Ambrosoli Hospital and Wipolo village. The guys fixed the ultrasound printer, internet, solar frig and xray, while the gals taught village healthcare in Wipolo village. Jerry cans for clean water were donated to the villagers. Their borehole was also repaired! We were all blessed beyond measure!

World Water Day 2012 Walk for Water

On March 31, 2012, Billings participated in the Walk for Water, our region's only World Water Day event. Over 250 members of our community walked and approximately 100 volunteered to raise awareness of the world water crisis and to learn ways we can act locally to reduce global impacts. This year's theme, The World is Thirsty Because We are Hungry, focused on the impacts of agriculture on water usage. On behalf of the World Water Day Event Committee, a special thank you to all of our amazing volunteers who have made this event possible! Thank you to our event sponsors who have made this possible! To everyone who participated in this year's event, you have made a difference! Awareness was great and the \$6,100 raised will benefit water projects in Uganda and Tanzania. To learn more about these projects, visit hope2onelife.org
